

TELEPSYCHIATRY SERVICES

- **APPLICATION DEVELOPMENT**
We can provide your health care facility an EMR/EHR that is fully customizable to your website and telepsychiatry needs.
- **HARDWARE/SOFTWARE MANAGEMENT**
Since 2007 the e-Psychiatry team has managed the setup and implementation of telemedicine equipment. Let us choose the right hardware and videoconferencing equipment for you.
- **PROJECT MANAGEMENT**
Let e-Psychiatry assist you with the setup of your infrastructure in order to run a successful telepsychiatry program.

TECHNOLOGY SOLUTIONS THAT WORK FOR YOUR PATIENTS

e-Psychiatry was established in 2009 as one of the nation's earliest telepsychiatry companies. We are a telepsychiatry company that provides not only recruitment and staffing of telemental health providers but also consulting for private and group practices, mental health clinics, hospitals, schools, prison systems to successfully implement the equipment needed for telemedicine programs. We can provide you with a very affordable telemedicine design or the most advanced telemedicine equipment money can buy.

We work with multiple telemedicine platforms to keep our costs to you and your patients as low as possible. Our years of experience has given us the ability to choose the best telemedicine hardware and software for your facility. We ensure each telemedicine program we set up is HIPAA compliant and the equipment we use is from a preferred vendor of the ATA (American Telemedicine Association)
